## DESCRIPTION

The 't' designation in this variation on the 84 refers to its use as a table light. The table light has a 2350mm (72") long flexible cable with dial control for on/off/dimming. There is a notch on the back of the pendant base and dial control for wall mounting.

A white glass bubble is captured inside a fine copper mesh basket and then plunged into hot clear glass. Air is blown into the matrix to gently push the white glass through the mesh, creating a delicate pillowed form that is suspended inside the thick outer layer of clear glass. Sometimes the copper mesh basket folds and crinkles, adding specificity to each piece.
